

DHRUVA N

Aspiring Software Engineer | Computer Science & Business Systems Student

Hassan, Karnataka | +91 90191 48668 | ndhruva1234@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science and Business Systems student with hands-on experience across full-stack web development, AI agent systems, computer vision, and blockchain-based data security. Proficient in Java, Python, and C++, with working knowledge of JavaScript, React.js, Redux, FastAPI, and SQL. Seeking a Software Engineering Internship to apply strong programming fundamentals and grow into full-stack and AI-driven development.

TECHNICAL SKILLS

- Programming Languages: Java, Python, C++, JavaScript
- Full-Stack Development: React.js, Redux Toolkit, FastAPI, REST APIs, HTML, CSS
- AI & Agent Frameworks: LangGraph, LLM Integration (Groq API), Machine Learning, Computer Vision
- Databases: PostgreSQL, SQL, Database Management Systems (DBMS)
- Cloud & DevOps: Vercel, Render, Git, GitHub, Version Control
- CS Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

PROJECTS

AIVOA — AI-Powered Customer Complaint Management System | *React, Redux Toolkit, FastAPI, LangGraph, Groq LLM, PostgreSQL*

- Built and deployed a full-stack, AI-agent-driven complaint management system for pharmaceutical manufacturing, live on Vercel (frontend) and Render (backend + PostgreSQL).
- Designed a 7-node LangGraph pipeline — extraction, completeness checking, duplicate detection, risk classification, root cause analysis, CAPA recommendation, and summarization — powered by Groq's gemma2-9b-it LLM.
- Result: Delivered a working, publicly accessible, end-to-end AI agent system with a React + Redux Toolkit UI that auto-populates and risk-assesses complaint records from uploaded documents.

AI-Driven Face Recognition-Based Attendance Management System | *Python, OpenCV, Machine Learning, Database Management*

- Engineered an automated attendance system using computer vision and ML, replacing manual rollcall with real-time facial recognition that logs individuals directly into a database, tuning detection to handle varied lighting and angles.
- Result: Eliminated manual attendance tracking, reducing administrative overhead and human error in record-keeping through automated data logging.

Emo-Therm Secure Chain: Blockchain-Enabled Framework for Encrypting Emotional Thermal Images | *Python, Blockchain, Machine Learning, Image Processing*

- Designed a data security framework combining blockchain technology with thermal image processing, implementing encryption and decentralized access-control logic to keep sensitive biometric datasets tamper-proof.
- Result: Delivered a working proof-of-concept for privacy-preserving handling of sensitive biometric data using blockchain-backed security architecture.

EDUCATION

Bachelor of Engineering (B.E.) — Computer Science and Business Systems | Malnad College of Engineering | 2023 – 2027

PUC / Class 12 — Creative Pre University College, Karkala — 83%

SSLC / Class 10 — Amritha Bharathi Vidya Kendra, Hebri — 63%

CERTIFICATIONS

- Artificial Intelligence in 3 Hours — Infosys Springboard (May 2026)
- Certificate of Participation, Round 2: Detailed Presentation Submission — EY Techathon 6.0

ACHIEVEMENTS & LEADERSHIP

- Advanced to the second round of EY Techathon 6.0, a national-level innovation competition; coordinated college-level technical events, demonstrating team leadership and project coordination.
