

DHRUVA N

Aspiring Software Engineer | Computer Science & Business Systems Student

Hassan, Karnataka | +91 90191 48668 | ndhruva1234@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science and Business Systems student with hands-on project experience in computer vision, machine learning, and blockchain-based data security. Proficient in Java, Python, and C++, with working knowledge of JavaScript, HTML, CSS, React.js, Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), and SQL. Seeking a Software Engineering Internship to apply strong programming fundamentals and grow into full-stack development and software tooling.

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, JavaScript

Front-End Development: HTML, CSS, React.js

Databases: SQL, Database Management Systems (DBMS)

CS Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

Tools & Platforms: Git, GitHub, Version Control, MS Office

Emerging Technologies: Cloud Computing Fundamentals, Artificial Intelligence (AI), Machine Learning (ML), Computer Vision

PROJECTS

AI-Driven Face Recognition-Based Attendance Management System | Python, OpenCV, Machine Learning, Database Management

- Engineered an automated attendance system using computer vision and machine learning, replacing manual rollcall with real-time facial recognition to identify and log individuals directly into a database.
- Designed and implemented the end-to-end data pipeline connecting face capture, recognition, and database storage, tuning detection algorithms to handle varied lighting conditions and angles reliably.
- Result: Eliminated manual attendance tracking, reducing administrative overhead and human error in record-keeping through automated data logging.

Emo-Therm Secure Chain: Blockchain-Enabled Framework for Encrypting Emotional Thermal Images | Python, Blockchain, Machine Learning, Image Processing

- Designed a data security framework combining blockchain technology with thermal image processing to protect sensitive emotional and biometric datasets from unauthorized access.
- Implemented encryption algorithms and decentralized access-control logic to keep stored images tamper-proof, while applying machine learning techniques to analyse and classify the dataset.
- Result: Delivered a working proof-of-concept for privacy-preserving handling of sensitive biometric data using blockchain-backed security architecture.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Business Systems | Malnad College of Engineering | 2023 – 2027

PUC / Class 12 | Creative Pre University College, Karkala — 83%

SSLC / Class 10 | Amritha Bharathi Vidya Kendra, Hebri — 63%

CERTIFICATIONS

- Artificial Intelligence in 3 Hours — Infosys Springboard (May 2026)
- Certificate of Participation, round 2: Detailed Presentation Submission — EY Techathon 6.0

ACHIEVEMENTS & LEADERSHIP

- Advanced to the second round of EY Techathon 6.0, a national-level innovation competition.
- Coordinated college-level technical events, demonstrating team leadership, project coordination, and volunteer management.
